

On the pulse

Passport? Check. Tickets? Check. Toothbrush... Wherever you're heading for your summer break, make sure you're flashing a dazzling A-lister smile

Whatever your holiday destination – perhaps cool Cape Cod or mellow Cape Town – make the new Oral-B® Pulsar™ toothbrush part of your essential travel kit, along with your Dior sunglasses and Pickett pashmina.

As a global leader in dental care, Oral-B understands that many of us prefer to use a manual toothbrush. Its latest version, Oral-B Pulsar, combines the feel of a traditional toothbrush with state-of-the-art technology. Oral-B Pulsar has three innovative features – MicroPulse™ bristles, a split brushhead and a pulsing action – which all combine to create

a unique sensory experience that will totally revolutionise manual brushing.

MicroPulse™ bristles pivot back and forth to penetrate deep between teeth and clean along the gumline, while the

elastomeric pads on the bristles gently pulse as they sweep away plaque from the tooth surface. Meanwhile, the split brushhead allows the bristles to adjust to the contours of your teeth,

moderating how much pressure is applied to ensure gentle brushing as well as a thorough clean. So keep your finger on the pulse and you'll be showing off a gorgeous A-lister smile all summer long.

THE LOWDOWN

Oral-B Pulsar is available at supermarkets and selected stores nationwide. Choose from blue, lilac, red or green – with soft or medium bristles, and a compact or regular head size. For more information, visit oralb.com.
